*100 cm D

182 cm H

PUBLIC INTERNET – POINT & CLICK INTERNET ACCESS The Internet continues to grow in popularity, millions of travelers and holidaymakers have their own e mail accounts so that they can keep in touch with friends and family no matter where they are in the World. By installing a Public Internet kiosk, which is no more complicated to use than a public telephone, you can now offer the Internet to a much wider group of potential customers. **SO WHAT DO THESE KIOSKS LOOK LIKE?**Uniquely, our system has been designed and built in U.K specifically for Public locations such as Hotels, Bars, Airports, Shopping centres etc. With an IBM Computer a waterproof / Vandal proof keyboard, ELO touch screen and a secure, robust casing. Much research and development has gone into providing a low tech kiosk, ideal for any busy environment. Our silver and blue coin-operated kiosk is available as a stand alone kiosk, table top, or with optional stand.**HOW DO WE WORK?**The kiosks will be supplied on a share basis. It requires a broadband (I-choice) connection and a single power source, both to be supplied by the location. We also offer full kiosk maintenance and a cash collection service. **HOW DO THE KIOSKS WORK?**Public Internet Homepage: Most people connecting to the

Internet for the first time find it confusing, and, once they are online, are simply overwhelmed by choice. Our eye catching and simple front page acts as a launch pad taking the user direct to dozens of regularly updated and popular websites. Public Internet Layers: Key categories such as E-mail, Web Search, Chat, Games, Sports, News, Travel and Shopping provide variety in a quick to access format. Freedom to Surf: The user can also access any website of their choice, at any time, through the URL address bar at the bottom of the screen. Privacy & security: Once the money - time section has run out, all the personal data or pages visited by the user will be automatically deleted by DYNOMEDIA operation program. With the next visitor on the kiosk all history is clear, and freedom to surf the web is granted form friendly user home page of kiosk, The kiosk is coin-operated and 1 Euro will give 15 minutes on-line to the Internet - this can be varied. (10 or 20 minutes)Another unique Public Internet feature allows a website of your choice to be accessed absolutely free of charge via our “Free Button”. This feature could be used to promote your own website. AND WHAT DO YOU GET OUT OF IT?A Public Internet kiosk will allow you to offer your Customers the opportunity to pick up their e mail, access up to date information/news and look at entertaining websites as well as the real possibility of attracting added business to your location. At all times Public Internet will support you to get the best out of the kiosk. Oh, and of course, you gain an additional revenue stream, with a share of the cash generated by the kiosk. Our experience shows there is no substitution of income generated from existing leisure machines on site. WHAT MORE CAN WE SAY?A Public Internet kiosk gives your target audience a simple and convenient way of accessing the Internet as and when they require it. So many locations have seen the benefit of this, that we now have nearly 800 kiosks in locations as far apart as Cyprus (100 kiosks), Germany and the United Kingdom. We operate kiosks in PRESTWICK AIRPORT, Scotland, BELFAST AIRPORT, Ireland, and we now talking with LUTON & CARDIFF airports. In Cyprus we have customers like The Capo Bay hotel, Nausicaa Hotel, Althea Beach hotel, Capetanos bay hotel, Mimosa beach hotel and many more.Latest contract of the company is with SODEXO Cyprus, operating in the British Bases in Cyprus.
